Discoveries

In 2010, Damon Runyon scientists made thousands of discoveries across the spectrum of cancer research. Below, we highlight a small selection of their most significant findings.

Damon Runyon Scientists:

- Reported the first treatment to improve overall survival in patients with metastatic melanoma.
- Combined chemotherapy, a stem cell transplant, and targeted radiation delivered by an antibody to achieve 100% remission in critically ill leukemia patients.
- Reported that regular use of aspirin after the diagnosis of colorectal cancer reduces the likelihood of recurrence and death in some patients.
- Developed a genomic map of 26 different human cancer types.
- Found that the chronic inflammatory state caused by obesity actively promotes liver tumors.
- Identified a new marker for breast cancer that is present in metastatic tumors up to 2000 times higher than normal.
- Reported the first successful use of expanded umbilical-cord blood transplants in a Phase I clinical trial to treat patients with acute leukemia.

Honors & Awards

Former Fellow Lewis L. Lanier, PhD, was elected to the National Academy of Sciences. Fifty-nine Damon Runyon scientists are now members of this elite group.

Seven Damon Runyon scientists were awarded prestigious NIH High-Risk Research awards.

Former Fellow Elaine V. Fuchs, PhD, was named the North American recipient of the 2010 L’ORÉAL-UNESCO Award for her contributions to our knowledge of skin biology and skin stem cells.

Damon Runyon-Rachleff Innovator John L. Rinn, PhD, was named one of this year’s “Brilliant 10” by Popular Science magazine.
Damon Runyon Cancer Research Foundation

Our Mission
To accelerate breakthroughs, the Damon Runyon Cancer Research Foundation funds today’s best young scientists and their innovative research. We support the rising stars of science, emerging leaders who have great potential to achieve breakthroughs in how we diagnose, treat and prevent cancer.

Research Programs
• 119 scientists at 46 institutions in 17 states were funded through Damon Runyon Awards. —$8.6 million was invested in their research.
• $7 million was raised to create the Dale F. Frey Award for Breakthrough Scientists, which will catalyze the research of the most accomplished and audacious scientists completing their Damon Runyon Fellowships.
• The Damon Runyon Fellowship Award was increased by 11% to further encourage these bright young minds.

Financial Information
Donations: $15.5 million
Expenses: $11.8 Million
  Program: 82.2%
  Administrative: 17.8%

100% of all donations fund cancer research.

All administrative and fundraising expenses are paid through Damon Runyon Broadway Tickets and our endowment.
